

When is a Plumbing Permit Required?

Plumbing permits are required for the following:

1. For all new plumbing installations.
2. For all existing installations if a fixture, soil or waste opening, or pipe is to be moved or relocated or if you are replacing more than 10 feet of piping.
3. For a new house sewer or for a house sewer that is to be replaced.
4. For a new water service or for a service that is to be replaced.
5. For an addition of a backflow prevention device to an existing water service.
6. For a new water heater or for a water heater that is to be replaced.

If you have any questions or need assistance, call your local state plumbing inspector or the Frankfort office.
