Fireworks Tent Site Approval

All tents that are being used for the purpose of selling fireworks and are greater than 400 square feet shall comply with the following requirements in accordance with Section 429 and Section 430 of the 2013 Kentucky Building Code.

A fireworks tent site approval *may* be required by the local building inspector in locations where a tent will be used for the retail sales of consumer fireworks. However, in counties where the local jurisdiction does not have a building inspector, a tent site approval application must be submitted to the Division of Fire Prevention. If the site is under the jurisdiction of the Division of Fire Prevention, a fireworks registration **will not** be issued without prior approval of the tent site location.

In order to reduce potential delays in receiving your fireworks registration, please consider beginning the site plan approval process as soon as possible. All fireworks information can be found on our website located at the following link: <http://dhbc.ky.gov/sfm/Pages/default.aspx>.

Please feel free to contact our office at 502-573-0382 with any questions you may have regarding these requirements.
